5th COURSE about TECHNIQUE and VIDEOFLUOROSCOPY INTERPRETATION in OROPHARYNGEAL DYSPHAGIA

Lecturers

Helena Bascuñana MD PhD. Physical Medicine and Rehabilitation. University Hospital *de la Santa Creu i Sant Pau*. Barcelona.

Gemma Garmendia MD PhD. Otorhinolaryngology. University Hospital *Quirón Salud*. San Sebastián. Donostia.

*****FRIDAY MORNING SCHEDULE*****

8:00-8:30 Registration.

8:30-9:00: Course opening

Professor Antonio Álvarez Badillo. Physical Medicine and Rehabilitation Department. Universidad Complutense de Madrid.

9:00-9:15 Application and realization criteria for a videofluoroscopy in swallow.

Helena Bascuñana

9:15-10:30 Necessary anatomy to know for a videofluoroscopy: anatomical and functional changes related to age.

Helena Bascuñana

10:30-11:30 Peculiarities of videofluoroscopy during pediatric age.

Helena Bascuñana

11.30-12.00

*****FRIDAY AFTERNOON SCHEDULE*****

16:00-17:00 Quantification of videofluoroscopy of swallow. Measurement methods: times in deglutition, hyoid movement, pharyngeal residue evaluation.

Gemma Garmendia

17:00-18:00:

How should I do the videofluoroscopy report and classify its severity?

Helena Bascuñana

18:00-18:30 Review of key concepts.

Helena Bascuñana/ Gemma Garmendia

18:30-18:45. Colloquium.

Moderates Helena Bascuñana/ Gemma Garmendia

18:45-19:00 Closure.

Helena Bascuñana/ Gemma Garmendia

12:00-12:30 AP and lateral projections in videofluoroscopy: postural changes in fluoroscopy.

Gemma Garmendia

12:30-13:30

Contrasts used in videofluoroscopy of swallow. How to prepare different dilutions.

Gemma Garmendia

13:30-14:00

Implementation protocol. Bolus and its order in adult videofluoroscopy.

5th COURSE about TECHNIQUE and VIDEOFLUOROSCOPY INTERPRETATION in OROPHARYNGEAL DYSPHAGIA

Who is this course for?

For doctors who work on oropharyngeal dysphagia and who are interested in performing this instrumental evaluation.
For speech therapists interested in knowing how the test is performed and what information provides them.
We welcome other health professionals who consider this test useful for their clinical work.

What can I expect from this course?

The faculty of this course aims to offer a useful clinical insight to learn how to do and report a videofluoroscopy.
The most relevant topics to be discussed are:

1. Anatomy and physiology of normal radiological swallowing and its particularities in various pathologies.
2. Differences and particularities of videofluoroscopy in adults and children.
3. Indication of the different radiological projections.
4. Assessment and quantification of the test using observational scales and measurement methods.
5. Classification of the severity of oropharyngeal dysphagia according to videofluoroscopic findings.
